

Derekson

Areas of specialization

DEREKSON LIMITED was incorporated in 1992 as a limited liability company in Nigeria and has grown from a modest beginning to become a major engineering, contracting and consulting firm.

Derekson Limited has optimally demonstrated expertise in delivering engineering projects in project management monitoring, evaluation, supervision and turnkey projects in electrical power, infrastructure, mechanical engineering, environmental and oil & gas over the past 27 years. We have expertise in the delivery and management of international donor funding agency projects including the world bank, AFD etc.

Technical Partners:

To accomplish our set vision, Derekson Limited has affiliate technical partners in USA, Europe, the Middle East and Asia, structured on a need to use basis, where a particular partner has developed exceptional technical expertise. Derekson Limited has fruitful relationships with other indigenous organisation and also satisfies the requirements of operationalising the local content policies of government
